

Colibri Studio™

Complete Management Software for the Studio Industry

Colibri Studio is the complete, cross-platform solution for the studio rental and services industry. Get rid of separate calendar, contact management, job management and rental applications, and improve productivity and profitability by taking advantage of the first comprehensive solution for studio management.

Colibri Studio Features

Calendaring – Colibri Studio provides an integrated studio calendar with daily, weekly and monthly views. Edit and add job days directly from the calendar or access the job detail screen and equipment check in/out in one click. Filter calendar views by job status, location, and personnel.

Job Estimating – Create job estimates within minutes using Colibri Studio's estimating tools. Generate equipment lists from simple drop-down lists and add groups of related equipment in one click. Customize pricing and apply discounts for individual items or an entire equipment list. Send a job quote with detailed backup in PDF format to the customer via email directly from Colibri Studio.

Job Management – Colibri Studio helps to better manage the entire job process: estimating; equipment lists; studio and personnel scheduling; daily pick lists; in progress equipment check in/out; catering, coffee bar and phone; purchase orders and invoicing. Follow a clear step-by-step interface that makes sure that all work is completed and the job is invoiced immediately upon completion.

Inventory Management – Colibri Studio includes complete, multi-location equipment management. Create an infinite number of equipment and service types with a full range of pricing and billing options. Track the status of every piece of equipment in your inventory,

including job and repair histories. Query equipment availability at this moment and anytime in the future. Transfer one or more pieces of equipment in a single click with integrated barcoding tools. Create and manage purchase orders for new equipment, repairs and sales items.

Tasks and Activities – Colibri Studio allows management to task staff with job responsibilities and track their progress. My Tasks lets individual users manage their own activities. All important job activities, such as emails and phone calls, are logged in the system automatically.

QuickBooks Integration – For studios using QuickBooks accounting software, Colibri Studio offers complete integration for customer and vendors, jobs, invoicing and purchase orders. A clean, managed interface makes sure that all data is transferred from Colibri Studio to QuickBooks without error.

Reports – Generate forms and reports in print, as a PDF, or attached to an email.

- Customer information
- Staff tasks lists
- Weekly job schedules
- Job estimates
- Daily call sheets and pick lists
- Invoices with detailed backup
- Purchase orders
- Equipment availability, job and repair histories

User Interface

Comprehensive Solution – Colibri Studio is an integrated environment for calendaring, contact management, job management, inventory management, equipment rental, and accounting integration in one solution.

Tabbed Interface – A tabbed interface and extensive use of data portals allow you to view a single record and access all information

related to it. For example, when you open a job record, you have one-click access to the job quote, equipment lists, job day pick lists, job activity and billing items.

Customizable – Colibri Studio is completely cross-platform with support for Intel-based Macs. **Colibri Studio can be fully customized to meet the unique needs of your and studio operation**, and can be integrated with any existing QuickBooks environment.

For more information about Colibri Studio, go to <http://www.colibrisolutions.com/products.htm>.

System Requirements

Client Workstation – Mac OS X® 10.4.9 or greater or Windows® 2000 XP Professional SP2/Vista; G4 or greater Mac (Intel Mac compatible) or Pentium 4 or greater PC; 512 MB RAM or greater; 10/100BT network interface card. QuickBooks integration requires Apple Boot Camp, Parallels Desktop, or VMWare Fusion for Mac or a Windows PC and works with QuickBooks Pro, Premier or Enterprise version 2002 or greater.

Server – Mac OS X 10.4.9 or greater or Windows 2000/2003 Server; 2 GB RAM or greater; RAID 5 configuration preferred; 100BT network interface card.

Customization and Support

Colibri Studio is available in a multi-user client/server configuration for maximum performance and security. Colibri Studio can be customized to meet the needs of your individual operation, and a range of ongoing support options is available. Call for complete pricing and support options.
